SOMA Construction & Development was established in 2011 under the name SOMA Construction Service as one of department of SOMA Group Co., Ltd. In January 2014, SOMA Construction& Development Co., Ltd was adopted as a fully construction and architecture firm.

SOMA Construction & Development Co., Ltd. (SMCD) is an established construction and architectural company that provide services including Architectural, Interior Architecture, Urban & Master Planning, Civil, Structural, Mechanical & Electrical Engineering, Project & Construction Management, Cost Management, Construction, Construction Material and Property Development.
Vision and Mission

Our vision is to transform SOMA Construction & Development into a leading company and build up the sustainable construction to our clients.

Our mission is to complete project safety, economically, functionally and creatively. To do this, we have kept on our Strategies; Manage our structures, policies, Communications, and Develop our staffs.

**KEY STRATEGY**

- Strategy Plan
- Management
- Communication
- Development
SMCD is its people, an excellence array of young and senior talent. We take client’s goals and need for strategic design and seamless delivery seriously, connecting our entire team to leverage its creativity, knowledge and experience.
Corporate Responsibility

As we are a design and construction company, we are responsible for the welfare of infrastructure in society, protect environment, and promote young engineer and architects to be leaders.

Responsibility in Society
- Bring esthetic to the city
- Build sustainable building

Responsibility for the Environment
- Promote Passive and Zero Energy Design
- Human + House + Nature

Responsibility as an Employer
- Promote young engineers and architects work together

Responsibility as a Partner
- Be a good partner and build up cooperation
Our Services

Architecture & Interior Design

- Architectural Design
  Our concept is to build a sustainable future with visually appealing, flexible, comfortable, secure, pleasure and efficient design. We design architectural building where it pay their way, adding real value for their owners and users. SMCD Architecture reflects our knowledge of how people and organizations use and experience spaces. We work collaboratively with clients and communities to create buildings that work very well on every level, inside and outside. We deliver them across our global markets with a consistent high standard service.

- Interior Design
  SMCD designs interior spaces for living and working. Interior performance can be measured in human and organizational terms: higher productivity, greater creativity and innovation, increased sales. Hitting the mark means designing not just for visual impact, but also for health, comfort, flexibility and ease of use. Our designers work collaboratively and strategically to deliver innovation, quality and sustainable performance. Our projects are standard in scope and range from offices to stores, academic and civic buildings, convention centers, school and entertainment venues.

- Landscape Design
  SMCD landscape designers work internationally on a broad range of project, from small gardening to huge masterplanning, with many years experienced in landscape local and international, our landscape designers are capable to achieved innovative landscape design from their creative imagination.

- Urban Planning
  SMCD planners work globally on a broad range of projects, from new urban districts and developments to suburban and exurban campuses, centers and communities. Sustainability is an important focus with equal concern for the socio-economic health of the community and for its environment quality. As urban designers, we know how to bring forward the experiential attributes that make a place memorable and attractive.

Engineering & Construction

- Structural Design
  Creating innovative and practical building structure design, our experts ensure that every project meets and exceeds the expectation of client and building user. Combining local market knowledge with technical expertise, our structural engineers approach a creative, sustainable and holistic design approach which from the outset, embraces low-carbon and economic operational performance. Our professionals engineer strive to delivery visionary buildings that maximize naturally occurring energy and minimize waste. From creation to completion and beyond, we help clients reach the optimum potential of every project.

- Project Management & Consultancy
  Our experienced project managers are specialist in architecture, civil, structural design and MEP engineering who work effectively on coordinated and efficient cost. This approach helps client to reduce the investment cost and improve the construct ability though innovative and value-engineered solution.
